

available supports

training 1 equipping 2

Professional development presentations are completely customizable to fit your needs.

Options include:

- Introduction to Neurodevelopmental Trauma
- Creating and Supporting a Trauma Informed School
- Strategies to Support Regulation
- Reframing Behavior through a Trauma Informed Lens

...and anything we can dream up together!

The Train-the-Trainer series builds capacity by equipping district and building level teams to lead implementation efforts in their own settings. Topics may include:

- Structuring the Physical Environment
- Establishing Safety and Consistency
- Prioritizing Relationships
- Minimizing Shame
- Integrating SEL
- Supporting Emotional Regulation
- Compassion Fatigue/Collective Care

modeling 3 coaching 4

Trauma informed case study sessions provide an opportunity for collaborative problem solving and process modeling by using one of your students/clients as a catalyst for our learning. These sessions walk participants through the process of applying a trauma informed lens and provide strategies, tips, tools, and a customized framework to use with district or building level teams.

Onsite coaching allows participants to apply trauma responsive practices in real time with feedback and support.

Options include:

- Environmental audits
- Classroom observations
- Team teaching
- Targeted support for the integration of trauma-informed practices
- Review of schoolwide expectations, behavior response plans, student data, etc. through a trauma informed lens
